AIR Power supply
Compressed Air

The M2A is a series of Vacuum Lifters which contains a wide range of 2-plates models with capacities ranging from 250 kg to 1500 kg. The M2A series is compressed air powered. The **manual tilting system** allows a vertical – horizontal movement and vice versa. The maximum capacity of the lift depends on the size of the suction plates.

It is equipped with an **audio-visual alarm** control unit that warns the operator of possible dangerous situations. The vacuum gauge with coloured scale allows constant control of the vacuum level reached. It is present a **filtering system** for dust and condensation.
