

SEALING FOAMS VACUUM GRIPPERS

Introducing our cutting-edge sealing foam for vacuum grippers, engineered to elevate your automation processes to new heights of efficiency and reliability. Crafted from premium materials, our sealing foam ensures a perfect seal between the gripper and the object, maximizing suction power and grip strength.

FOAM type MK

Available in thicknesses of 5, 10, 15, 20, 25, and 30 mm, as well as custom sizes.

Do not leave residue of glue when replacing the foam.

Extra soft structure.

Very short reset time.

Designed for wavy surfaces. Best suited for porous workpieces such as cardboard boxes or untreated wooden boards.

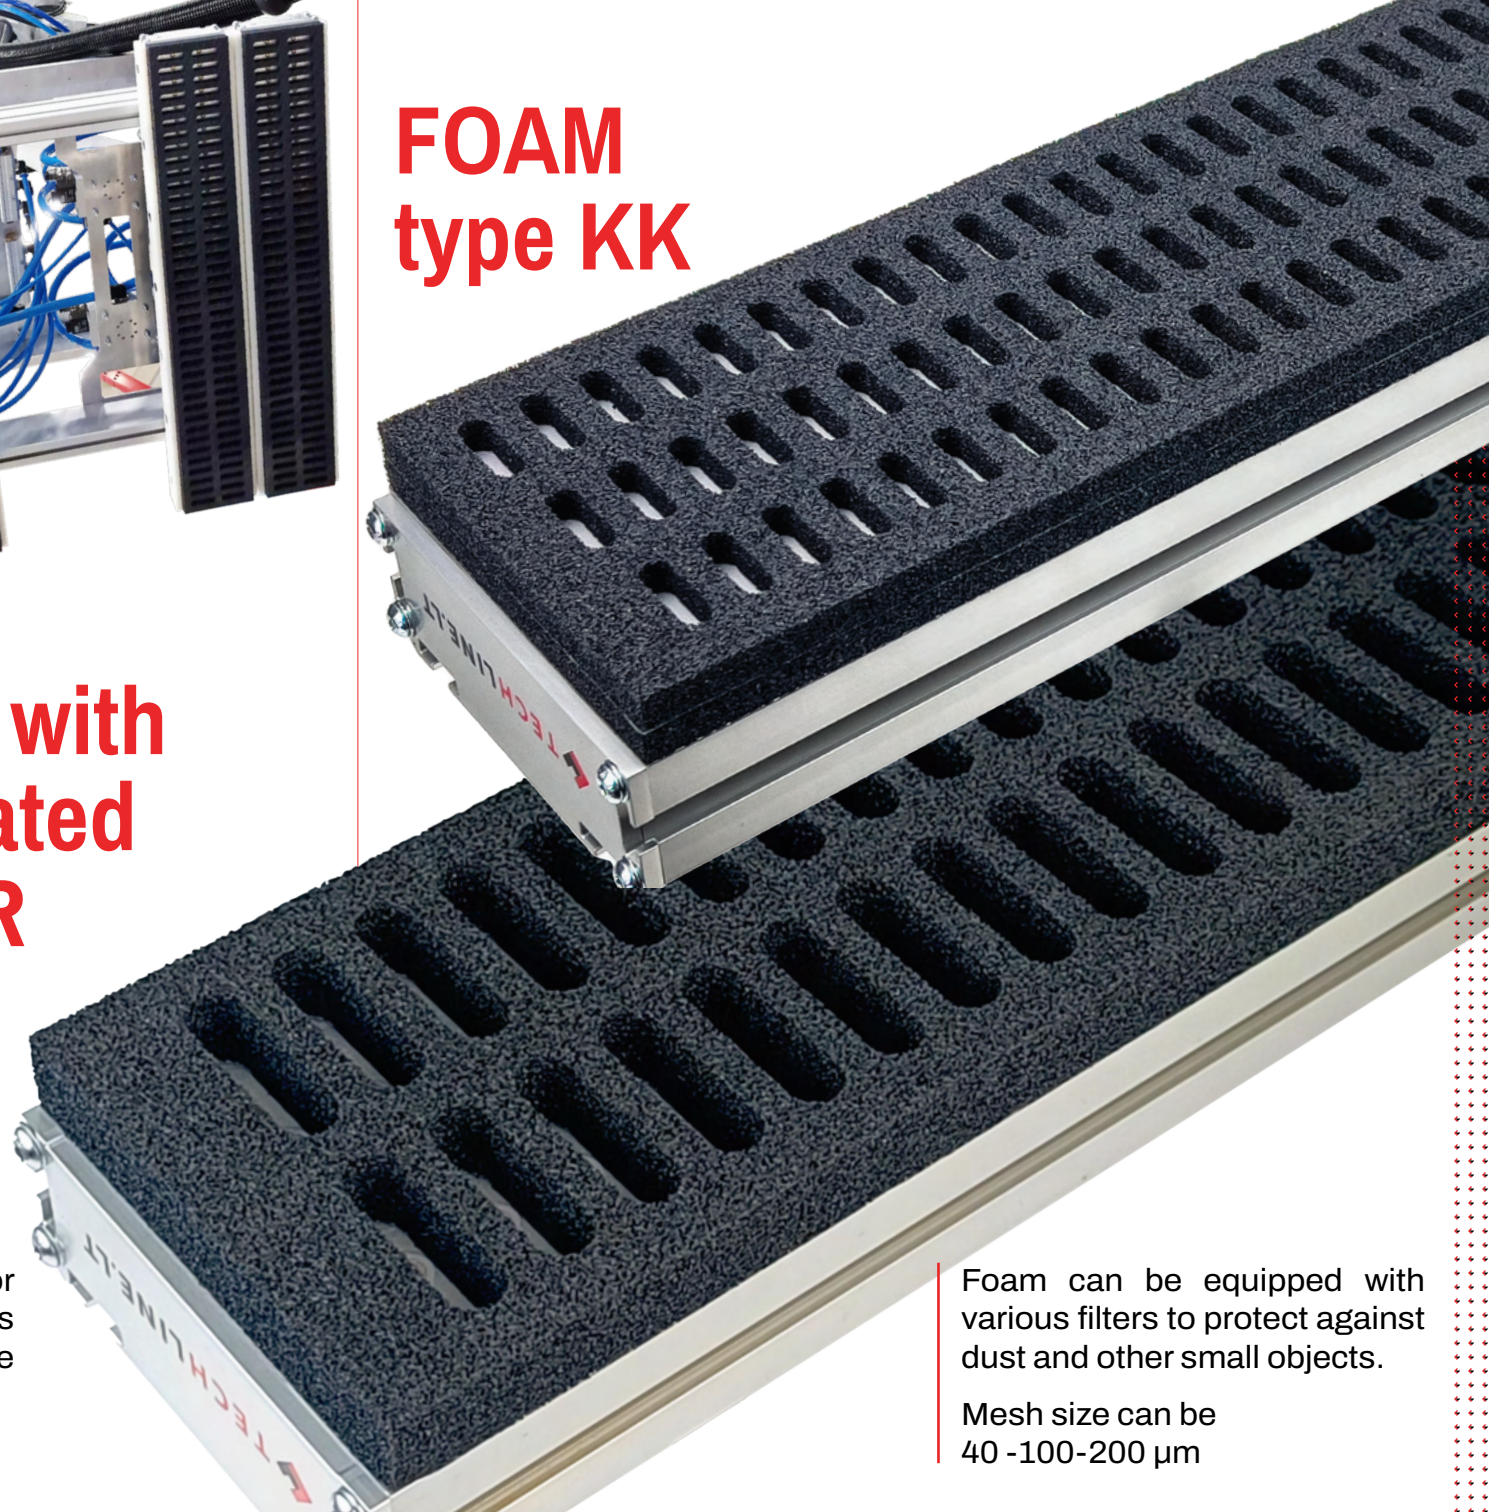

FOAM type KK

FOAM with integrated FILTER

Soft structure.

Very short
reset time.

No any need for
special tools
to replace the
foams.

Foam can be equipped with
various filters to protect against
dust and other small objects.

Mesh size can be
40 -100-200 μm

MK

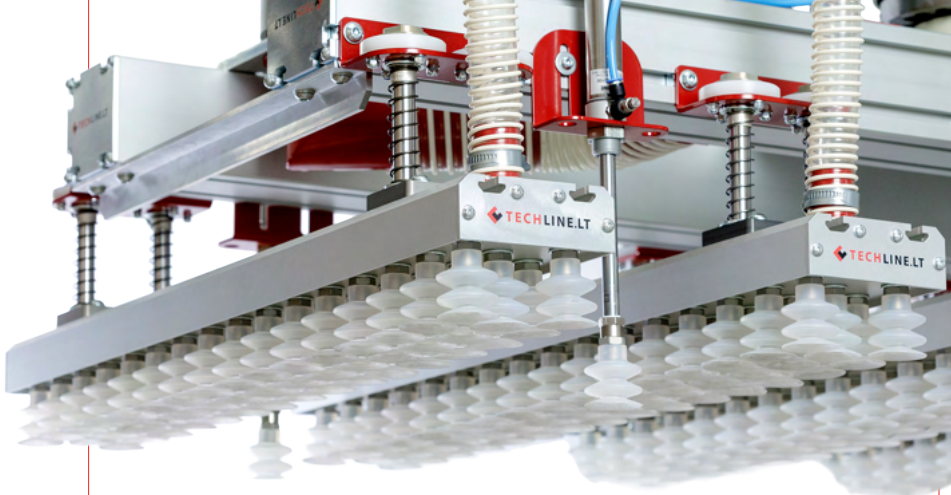

I am glad you liked our
products, let's do bussiness

KK

We know how make
your life easier :)

INTEGRATED FILTER

In our company is way more of
those and others things

SEALING FOAMS FOR VACUUM GRIPPERS

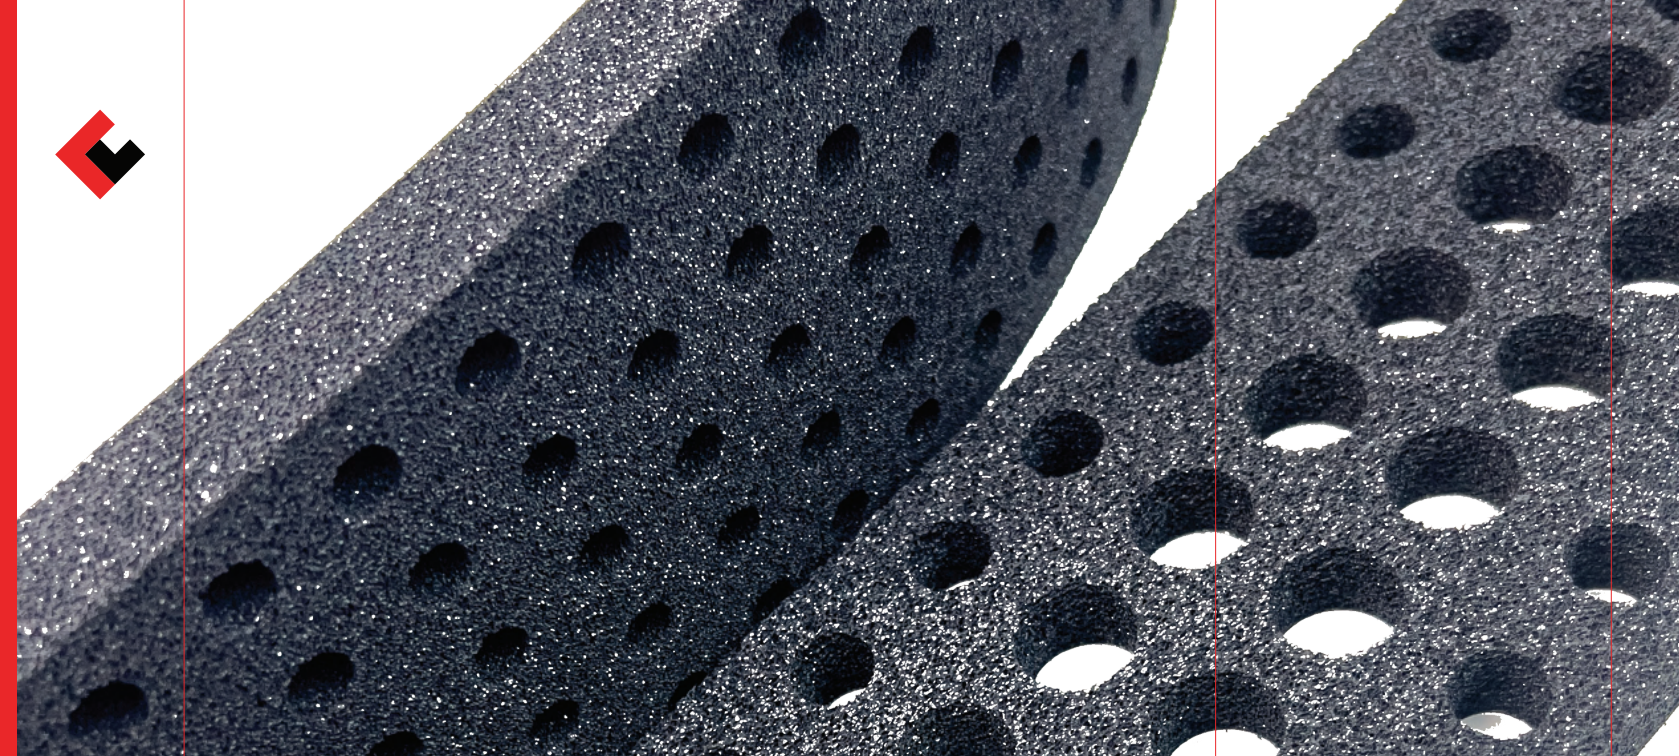

MK, KK, FOAMS WITH FILTERS have a self-adhesive side for quick, easy fixing to metal supports. The temperature of use ranges from -40°C to + 120°C and it offers excellent resistance to heat, low temperatures and ageing. The low density and softness of this foam rubber allows gripping surfaces to adapt to any kind of surface.

TECHLINE.LT

2024

UAB „Technologinė linija“ specializes in designing of vacuum grippers, vacuum components and tools for industrial robots. Committed to excellence and customer satisfaction, we strive to deliver high-quality products and services that drive efficiency, productivity, and growth.
